Education

BS **San Francisco State University**, Computer Science San Francisco, CA
• Minor in Mathematics Sept 2009 – Dec 2014

Experience

PayPal/Venmo, Staff Software Engineer (Infrastructure) Bay Area, CA
June 2026 – present
2 months

Groove.co/Clari, Staff Software Engineer (SRE) Bay Area, CA
Oct 2023 – June 2026
2 years 9 months

- Led observability (traces/logs/metrics) platform migration from New Relic, Datadog, and Sumo Logic to SignalFx and Splunk Cloud across 80+ services
- Integrated OpenTelemetry SDKs with Ruby, JavaScript, and Java applications
- Built service catalog with automated Kubernetes service syncing, entity validation, and cross-repo PR automation for service ownership; reduced drift between multiple infrastructure services and keeping org-wide systems in sync
- Designed standardized ECAM dashboards and detectors using CDK for Terraform across 80+ services
- Established on-call rotations with runbooks, PagerDuty escalation policies, and incident response processes
- Migrating Chef and Heroku applications over to EKS, including observability enablement across both environments during transition, saving roughly \$700k a year

Groove.co/Clari, Senior Site Reliability Engineer Bay Area, CA
Apr 2022 – Oct 2023
1 year 7 months

- Integrated multiple applications with OAuth2.0/SSO
- Migrated existing search endpoints to use AWS ElasticSearch/OpenSearch
- Imported existing company resources into Terraform, creating common modules for those resources
- Identified, monitored, and improved database latency performance for multiple transactions in Ruby on Rails

Oracle Corporation, Senior Software Engineer (Technical Content/OpenSearch) Bay Area, CA
June 2019 – Apr 2022
2 years 11 months

- Led Operational Incidents Review board to improve overall operations posture
- Migrated multiple service environments to use Terraform configuration buildout on Cloud Environments
- Added support for non-English languages on Oracle Cloud documentation site
- Migrated majority of Oracle Cloud documentation from MadCap Flare to Oasis DITA formats

Oracle Corporation, Software Engineer (Technical Content) Bay Area, CA
Nov 2018 – June 2019
8 months

- Designed, scaled, and operated a Content Deployment Pipeline for multiple different orgs and documentation structures
- Integrated multiple tools with Oracle's OAuth implementation to improve security
- Wrote tooling to keep multiple environments up to date with FedRamp patching requirements

Oracle Corporation, Site Reliability Engineer (Object Storage)

- Built, maintained, and supported several different Object Storage clusters with hundreds of nodes
- Developed and maintained best on-call practices/standards for all engineers
- Migrated multiple clusters from Layer 7 to Layer 4 Load Balancing solution to ensure higher throughput speeds with less management and configuration
- Maintained internal configuration and scripting for alarming, DNS, node provisioning, and code deployment

Bay Area, CA
July 2017 – Nov 2018
1 year 5 months

Cisco Systems/Piston Cloud Computing, Software Engineer (Object Storage)

- Designed and deployed both Object and Block Storage solutions for Cisco Cloud
- Maintained, built, and scaled Ceph storage clusters
- Designed and built Solidfire, NFS, and Pure Storage clusters

Bay Area, CA
June 2015 – Mar 2017
1 year 10 months

Cisco Systems/Piston Cloud Computing, Customer Support Engineer

- As a senior member of the customer success team, responsible for large scale customer OpenStack clusters providing Compute Instances, Authentication, Object Storage, and Block Storage
- Designed, developed, and maintained in-house On-Call paging application to improve incident response time and engineer on-call experience
- Troubleshoot bugs with company software and upstream OpenStack software

Bay Area, CA
Dec 2010 – June 2015
4 years 7 months

Skills

Languages: Python, Java, Ruby

Frameworks: Django, Ruby on Rails

IaC & Orchestration: Terraform, CDKTF, Kubernetes, Chef, GitHub Actions

Observability: OpenTelemetry, SignalFx, Splunk Cloud, Datadog, New Relic

Cloud: AWS (EKS, CloudWatch, VPC, ALB), OCI

On-Call & Incident Management: PagerDuty, ECAM dashboards, KPI/SLA monitoring, incident escalation & review
